

TF5 NBS Education - Bi-annual Work Plan

Time frame: January 2026 – June 2026

Priority objectives*	
- From the overall TF objectives, which ones will the TF focus on in the next 6 months?	Objectives of TF5: - To foster community engagement and outreach: TF5 creates partnership with educational institutions and environmental organisations to raise awareness on NbS and showcase their positive impact through hands-on events and workshops. - To integrate NbS into curricula across Europe: TF5 promotes inter- and trans-disciplinary learning experiences that highlight the interconnectedness of ecosystems and emphasise the role of nature in addressing global challenges.
Implementation*	
- How will the TF contribute to the priority objectives within the indicated time frame? - Will there be any workstreams created for this purpose? Please specify.	i. The dissemination of project materials of all TF5 partners will be fostered by our regular meetings and the possibility to present materials to the other members. ii. We will extend an existing list of ENABLS on Open Educational Resources (OER) with the help of all TF5 members. - Keep each other informed about existing networks and ongoing work in NbS-related initiatives such as the NetworkNature Task Forces, - Share and promote existing materials through TF5 members' dissemination channels, so they can feed into future projects, - Identify the best platforms and methods to share NbS learning materials with the right audiences by fostering communication among projects and with the EU Commission, - Use TF5 meetings to introduce new projects, share experiences, and learn from one another in a collaborative and synergistic way.
Products & activities*	

- What activities and/or products will the TF develop in the indicated timeframe to contribute to the priority objectives? - Which is the target audience/end user of the activity/ies and/or product/s?	We will create a consolidated list of all open available educational materials from TF5 members that could be put on the TF5 webpage. This will be realised via a “Resource Collection Table” where all (or interested) TF5 members provide input on their project materials. The table is planned to be published to foster open access to these resources. The dissemination of this table will be done primarily on TF5 website and member projects’ Dissemination & Communication channels. We plan to publish the OER table on open repositories and link to that table on the NN website. Target audience: Educators and Multipliers for NBS
Outcomes	
- What measurable outcome/s is the TF aiming to achieve through the abovementioned activities/products?	See above: table for the NN website
Potential enablers	
- What are the enablers for the delivery of the activities/products (e.g. building on projects’ outcomes, events, resources, etc.)?	The following points are considered as enablers to achieve our objectives: - Existing educational materials produced by the member projects. - Knowledge sharing on NBS, biodiversity, climate change, pedagogical approaches, and other related subjects. - Participation of members in bi-monthly meetings regularly to stay up-to-date and exchange news & resources from their projects. - Communication between the members through the dedicated TF5 email list, bi-monthly and bi-lateral meetings. - Dissemination of outcomes, achievements, news, upcoming events, and other related resources through TF5 website on NN platform.
Potential risks	
- Do you foresee any risks/challenges? If so, how can they be overcome?	As the participation is voluntary, the activities are depending on the willingness of TF5 partners. Inclusion of new TF5 members seems to be challenging.
